Brake Tester Pdr 6

So that you arrive safely.

The Pdr 6 brake test unit is used for carrying out and documenting brake tests on rail vehicles.

- Tests can be performed in compliance with UIC 540, guideline 900.0080 and VPI_07.
- Modification by means of the portable 13" RailTab offers a high level of user friendliness while minimising data entry thanks to the following functions, among others:
 - Remote control via 13" tablet using a wireless internet connection to the Pdr 6
 - Digital documentation and archiving of brake test sequences
 - Manual target and actual comparison of the test pressures
 - Pressure graphs can be exported directly as a PDF file.
 - Test results presented in table format
 - Compatible with Windows 10
- Partially automated test sequence with automatic target/actual comparison:
 - Faults are indicated in the test sequence by pop-up windows
 - Various pop-ups, e.g. for operator information (entering values, remarks, etc.)
- Brake force measurement via radio
